

## NATIONAL SPACE DAY 2024

### Touching Lives While Touching The Moon : India's Space Saga

On August 22, 2024, our school celebrated National Space Day to mark the success of the Chandrayaan-3 mission, which had a significant impact on space exploration. The assembly featured Class VII students demonstrating scientific concepts through experiments: they illustrated density with a lemon in salt and normal water, showed surface tension with a balloon covered in tape and explained Newton's Third Law. Guided by Ms. Samrudhi, TGT Mathematics, these experiments captivated the audience and underscored important principles. The exceptional performance of the students received praise from the Principal. She announced that they would be awarded certificates of appreciation.

Additionally, a quiz and painting competition for grades 6 to 12 engaged students, testing their knowledge and creativity about space.

The day successfully inspired students to explore and appreciate the wonders of space and science. Such engaging activities foster a deeper appreciation for space exploration and encourage students to delve deeper into the wonders of science and space.
