

Report- Vidyanjali Project

In continuation to the volunteer services being provided under the Vidyanjali project (A Govt. of India initiative), APS Jammu Cantt hosted a visit of students of GMS Kotha Bhour on 21-11-2024 in the Science Lab. where Ms Taruna, (TGT Bio) explained the concepts to the students by giving them practical demonstration using scientific instruments and models. The program was aimed at giving practical exposure to the students of Govt. school where they do not have the facility of laboratories. Various activities such as demonstration of working model of electric circuit, presence of starch in food items using Iodine test, explanation of parts of flower using a colorful model and compound microscope were performed in the Science Lab. Mr. Ashish Anand (Project In-charge) was also present in the lab and helped the students in performing all these activities. All the students were actively involved in performing the demonstration of Iodine test and electric circuit. They also enjoyed by observing specimens of flower through the compound microscope. To and fro travelling services were provided to the students for coming to APS Jammu Cantt. Refreshment was also provided to the students of GMS Kotha Bhour. The students of Govt. school had a wonderful time experiencing Science Lab of APS Jammu Cantt and wished for more frequent visits to the lab.
