

NURTURE INNOVATORS – THE ROAD TO PATENTS

To inspire the students involved in AI and Tinkering Lab activities and encourage them to explore the limitless possibilities within these fields, a comprehensive workshop led by Mr. Akarsh Sharma, a renowned innovator and patent expert with an impressive portfolio of 21 patents, was held at our school. Mr Sharma is the founder of TopNergy Tournaments and has made significant contributions to the field of innovation. The workshop underscored the critical role of innovation in today's rapidly evolving world, beginning with the well-known quote, "Necessity is the mother of invention." He highlighted how challenges and needs can spur creativity, leading to groundbreaking inventions. The workshop offered a detailed exploration of Intellectual Property Rights (IPR), covering various types such as copyrights, trademarks, trade secrets and patents. Participants also learned about the importance of protecting intellectual property. Furthermore, Mr Sharma introduced the Summer Patent School at Shoolini University, portraying it as a premier opportunity for aspiring innovators to gain a solid foundation in patenting. Additionally, he highlighted the @catchityoung initiative, a platform aimed at fostering innovation among young minds.

Mr. Sharma's insights and experiences resonated deeply with the participants, inspiring them to think creatively and pursue their innovative ideas with confidence.
