

Atal Tinkering Lab (ATL), where creativity thrives and innovation knows no bounds! Established under the visionary Atal Innovation Mission by the Government of India, our ATL is a hub of inspiration and discovery.

Equipped with cutting-edge technology and resources, our ATL provides students with the platform to unleash their imagination, nurture their problem-solving skills, and transform ideas into reality. From robotics to coding, 3D printing to electronics, the possibilities are endless at our lab.

What sets our ATL apart is its inclusive approach. Not only do we foster innovation within our school community, but we also extend a warm welcome to students from neighbouring schools. Through our Community School Visit Program, we invite students from the local community to explore and engage with the wonders of our ATL. This initiative not only promotes collaboration and knowledge sharing but also strengthens the bonds within our community.

We express our gratitude to NITI Aayog for choosing Army Public School Jammu Cantt to establish the Atal Tinkering Lab

ATAL INNOVATION MISSION

ATAL TINKERING LABS

From Dreams in 3D  
to 3D Prototypes.
